What the controllers actually collect: seed 8
Vertical lines mark physical bounds. OU is the legacy Gaussian pair generator; new policies use actual physical actions.
walk
stay=0.05, Gaussian discrepancy=0.026
log_diffusion
stay=0.65, Gaussian discrepancy=0.027
wide_diffusion
stay=0.62, Gaussian discrepancy=0.032
target_fast
stay=0.21, Gaussian discrepancy=0.019
target_slow
stay=0.41, Gaussian discrepancy=0.022
deficit
stay=0.34, Gaussian discrepancy=0.021
start_random
stay=0.34, Gaussian discrepancy=0.044
ou
independent pairs; no actions, Gaussian discrepancy=0.005
