Why left? These updates move the zero crossing left
Exact finite parameter interventions, with Adam's shared denominator and saved momentum. Each panel has its own zoom.
Update 250 → 251
Old turn at distance 6.063
Update 500 → 501
Old turn at distance 3.444
Update 1000 → 1001
Old turn at distance 3.073
1e−2
1e−3
1e−2
Slope with respect to log distance
100 × log(distance / old turning distance)
